Description of innovation

Sri Shanti Ranjan Dey developed a low cost hatchery for fry and fingerling production in his own farm. In this system he has made a round cemented tank of 200 lit capacity, an out let is kept for drainage of excess water in its middle portion. A plastic net is surrounded at middle portion to check the flow of eggs and fry outside the tank. Another out let has kept at lower portion to collect fry.

Practical Utility of innovation

This 200 lit capacity hatchery can produce 6 to 7 lakh fry with in 12 hr. It's total cost of construction Rs. 1000/-.
